PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building scalable web applications and administrative dashboards. **Quick to adapt to emerging technologies and explore modern frontend tools**, with a strong passion for continuous learning. A collaborative team player who thrives in cross-functional communication, dedicated to writing clean code and optimizing user experiences.

TECHNICAL SKILLS

- **Frontend:** JavaScript (ES6+), TypeScript, React, HTML5, CSS3, jQuery, Styled-Components, Vite
- **Backend & Databases:** Node.js, MSSQL, RESTful APIs
- **Tools & Environment:** Git, VS Code, Eclipse, Cursor, Windows/Linux Server Management

PROFESSIONAL EXPERIENCE

Webcash Company | Seoul, South Korea

Frontend Developer | *2023.06 – 2026.05 (3 Years)*

- Developed, maintained, and optimized core web applications and large-scale enterprise solutions deployed across **100+ universities, research hospitals, and national institutes** in South Korea.
- Architected and implemented comprehensive **administrative dashboards** and environment-configuration tools, empowering superusers to manage global platform settings and granular user permissions.
- Built secure authentication and registration systems featuring institutional **Single Sign-On (SSO)** integration alongside social login capabilities (Naver).
- Bridged client institutional databases with the **rERP (Research Enterprise Resource Planning)** enterprise database, designing dynamic data visualization dashboards for complex financial and operational metrics.
- Developed automated keyword-matching algorithms connecting business grant announcements with faculty research profiles to streamline industry-academia collaboration workflows.

- Delivered standardized print templates, official certificates, and compliance export modules utilizing **OZ Report**, an enterprise reporting engine.
- Performed multi-environment remote troubleshooting across **Windows and Linux servers**, diagnosing critical system errors and conducting deep-level log analysis to maintain high service availability.

Rian Inc. | Busan, South Korea

R&D Software Developer (Project-based) | *2021.04 – 2021.06*

- Spearheaded the 1-person end-to-end development of a real-time AI IP camera NVR system for marine vessels.
- Integrated AI pose estimation models for human detection and successfully passed Phase 1 government business evaluations.
